1. Get a Kit

What supplies would you need to live for 3 days in an emergency?

Remember 3!

Make an Emergency Supply Kit— A collection of items you may need if you have to evacuate from your home or shelter-in-place in your home.

Make the kit easy to carry and ready to go at all times. Always keep it in the same place and only use it during an emergency.

• Water

In emergencies, your tap water might not be safe to drink and you may have to leave your home. Make sure you have enough bottled water to last for at least 3 days.

**One gallon of water per day.
 3 days = 3 gallons of water**

• for each person in the house •

If your needs require additional liquids, please plan appropriately.

• Food

Your kit should also include canned or packaged food that won't spoil and a can opener if your kit contains canned goods.

- **3 Meals per Day**
- **3 Days of Meals**

FOR FREE CONSULTATION DAVID MURPHY

• Winter Weather

Winter weather can bring heavy snow and ice. Update your emergency kit with extra warm clothing and blankets. Keep a small emergency kit in your car and update it with items you will need if you become stranded in the cold.

• Tornadoes

Tornadoes bring damaging winds that can throw deadly debris. Keep your family safe inside and determine the best shelter area away from windows and outside walls.

• Thunderstorms

Thunderstorms produce lightning which kills more people each year than tornadoes and hurricanes. Remember the 30/30 Lightning Safety Rule: Go indoors if, after seeing lightning, you cannot count to 30 before hearing thunder. Stay indoors for 30 minutes after hearing the last clap of thunder.

• Floods

Flooding is the nation's most common natural disaster. Some of the most frequent causes of flooding are spring thaw, heavy rains, levees & dams, and flash floods. Know your risks. Prepare your home and listen to local officials.

• Fire

Fire spreads quickly; there is no time to gather valuables or make a phone call. Plan your escape; make a family emergency plan. Place smoke alarms on every level of your residence. Never re-enter a burning building. GET OUT, STAY OUT!

St. Clair County's Only Designated Trauma Center

ANOTHER FIRST FROM McLAREN PORT HURON

Trauma care is one of the most complex and fast-paced areas of care requiring the skill of expert physicians, highly trained staff and a specialized environment to treat patients with some of the most severe injuries.

McLaren is the area's **only** designated trauma center

McLaren Port Huron has earned Level III Trauma Center Designation from the State of Michigan. This means we are able to care for the most serious trauma emergencies. Our staff and surgeons have gone through special training, and we have developed protocols and quality controls so we can provide the right care, right away.

1221 Pine Grove Avenue, Port Huron, MI 48060 | (810) 987-5000

Excellence in care for trips, slips, falls

Here in the Blue Water Area, the number one reason people need trauma care is for a hip or knee fracture. Fortunately, if you break a bone and need immediate emergency care, the trauma center at McLaren Port Huron is here for you.

When a trauma involves an orthopedic injury, our surgeons and orthopedic team carry additional skills. We are designated as a Blue Distinction Center for Knee and Hip Replacement by Blue Cross Blue Shield of Michigan.

Fire Safety Checklist for Homeowners and Renters

If there is a fire, you may have less than 3 minutes to get out of your home. Talk about what you should do to be safe. Make sure everyone in your home knows what to do if there is a fire.

Put a check in front of each statement that is true for your home.

Smoke Alarms

- Smoke alarms are on every level of the home.
- Smoke alarms are inside and outside sleeping areas.
- Smoke alarms are tested each month.
- Smoke alarm batteries are changed as needed.
- Smoke alarms are less than 10 years old.

Cooking Safety

- The cooking area has no items that can burn.
- People stay in the kitchen when they are frying, grilling, boiling, or broiling food.
- Pot handles are always turned toward the back of the stove.

Escape Plan

- There is a fire escape plan that shows 2 ways out of every room.
- Everyone knows where the safe meeting place is outside the home.
- Everyone living in the house practices the escape plan 2 times a year.

Carbon Monoxide Alarms

- Carbon monoxide alarms are located on each level of the home.
- Carbon monoxide alarms are less than 7 years old.

Electrical and Appliance Safety

- All electrical cords are in good condition and not broken or cut.
- People clean the dryer of lint after every use.
- All plug outlets are safe and do not feel warm when you touch them. (If they are warm, call the landlord or an electrician.)

Candle Safety

- Candles are in sturdy fire-proof containers that won't be tipped over.
- Adults blow out all candles when leaving the room or going to bed.
- Candles are kept out of reach from children and pets.

Test your alarm regularly.

Your smoke alarm is working if it makes a noise when you press the "test" button.

Children are sometimes curious about fire.

If you have children in your home, lock up any items that can start a fire (matches, lighters, cigarettes, etc.) and make sure children cannot reach candles.

Learn more about fire prevention:
www.usfa.fema.gov

U.S. Fire
Administration

FEMA

• Chemical/Biological Threats

A chemical threat involves the release of a toxic gas, liquid or solid that can poison people and the environment. Be ready to shelter-in-place with your emergency kit. Pick a spot on the lowest level of your home away from windows. Close off all outside air intakes like windows, fans, and air conditioners. Listen to your radio to find out when all is clear or if you have to evacuate.

14th Annual History of the Christmas Tree Walk

12 Days of Christmas!!

Dec. 8, 9, 10, 11, 14, 15, 16,
17, 18, 21, 22 & 23

Each night from 5:30 p.m. 9:00 p.m.

THERE IS NO ADDITIONAL CHARGE for emergency/weekend services.

• Blackouts

A blackout is a period of prolonged power outage. Make sure your emergency kit contains all items you will need, especially extra warm clothing during the winter. Listen to your battery-powered or hand-crank radio to find out if tap water is safe to drink and where shelters are located.

• Shelter-In-Place

You may be told to shelter-in-place if dangerous materials have been released into the air. First close all doors and windows and turn air conditioners and fans off. Go into a room with few windows and doors -

upstairs if you can. Take your emergency kit with you and listen to local radio or television for notice of when it is safe to come out.

Remember...

- 1. Get a Kit**
- 2. Make a Plan**
- 3. Be Informed**

TIPS:

- You change your clothes for the seasons, so change your emergency supply kit for the seasons too. For example, extra warm clothes are needed in winter months & rain gear is needed for spring, summer, and fall.
- We change our clocks twice a year for Daylight Savings Time. When you change your clocks, also change your smoke alarm batteries and the water in your emergency supply kit.

Did You Know...

If you plan your funeral in advance, you buy in at today's cost and pay in stages.

You're covered while you continue to enjoy your life.

Call Michelle to learn more.
